To "Pedro Barba"	3,8 Km	55 min	-----

DURING YOUR STAY…

- Respect native plants and animals, they could be unique on the planet.

- Walking is a perfect way to explore the island. However, avoid walking outside the paths. If you go by bike, keep to the authorized roads.

- There are no lifeguards or rescue staff on the beaches, so be careful, especially on the beaches situated in the northern part of the island.

- If you wish to camp you must aquire permission in advance and keep to the designated area. Remember you are in a protected area, so fires are not allowed.

- If you´d like to fish for recreational purposes, don´t forget your license. Respect the minimum size limit (try not to fish young fish). Remember it is forbidden to collect shell fish and also forbidden to practice under - water spear fishing.

- Take away your waste. In this way you can help to reduce the high cost of rubbish collection on the island.

- You can buy fresh fish from the so called "Lonja" - which is the first point of sale. In this way you help to support both the local economy and professional fishing practices.

- We would welcome any suggestions that coud helps us to improve our nature reserve. Please leave them in writing at the information stand.
